

How should Revolution be applied?

1. Remove the Revolution tube from its protective package.
2. Holding the tube upright, firmly press the cap down until you hear a 'click' sound, which signals that the cap has punctured the applicator seal. Remove the cap and check to be sure that the tip of the tube is open.
3. Part the hair on the back of the animal at the base of the neck, in front of the shoulder blades, until the skin is visible.
4. Apply the tip of the Revolution tube directly to the skin. Squeeze the tube firmly 3–4 times in one spot until empty. Keep tube compressed on the final squeeze to avoid drawing liquid back into tube. Avoid contact between Revolution and your fingers.
5. While keeping tube squeezed, drag it away from liquid and lift up to remove.
6. Ensure tube is empty.

Do not massage Revolution into the skin.

Do not apply when the haircoat is wet.

Do not apply to broken skin – Revolution contains alcohol.

Stiff hair, clumping of hair, hair discoloration, or a slight powdery residue may be observed at the site in some animals. These effects are usually temporary and do not affect the safety or effectiveness of the product.

Can I give my pet a bath after applying Revolution?

Yes. Studies show that effectiveness is not reduced by bathing or immersing your pet in water two hours after application.

When can I play with my pet following treatment with Revolution?

You should avoid contact with application site when wet. You may hold or play with your pet any time after the area on which Revolution was applied is dry.

I see fleas on my dog or cat. Is Revolution working?

Revolution kills adult fleas and prevents flea eggs from hatching. You may occasionally see a few fleas on dogs or cats treated with Revolution but more than 98% of adult fleas are killed within 36 hours.
